	Examiner Quoc D. Tran	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 10-25 are rejected under 35 U.S.C. 102(e) as being anticipated by *Gidron et al* (2003/0232616).

Consider claims 10 and 24-25, *Gidron et al* teach a system and method for generating service-oriented call-charge data for at least one service in a communication network (see abstract), comprising: a charge metering domain (*network components*); metering points, the metering points being network elements for charge metering provided in the charge metering domain (see paragraphs 0059; 0096); data being produced for a user being transmitted via a number of metering points (see paragraph 0097, *CDRs being transmitted to billing or external billing system*); a charging domain (*billing/external billing system(s)*); charging points, the charging points being network elements for charging provided in the charging domain (see paragraphs 0097; 0108); and a policy function which controls both the charge metering points and the charging points by using predefined rules (see paragraphs 0087-0091; 0100-0101).

Consider claims 11-23, *Gidron et al* directly and/or indirectly teach the claimed policy function features (see paragraphs 0087-0091; 0100-0101).
